CERTIFICATIONS & TRAINING

Java Fundamentals

June 2023

Oracle Academy, Award of Course Completion

Systems Administration

June 24, 2023

Award of Course Completion, STI College in partnership with Linux Professional Institute

National Service Training Program (NSTP)

June 2023

Certificate of Recognition for successful participation and contribution, STI College – Cubao

Leadership Seminar

May 19, 2023

Participated in *Equipping Gen Z Leaders in a New Normal*, enhancing leadership and adaptability skills.

PROJECTS

Ordering Mobile Management System

- Developed a digital ordering and management system featuring Point of Sale (POS), Kitchen Display System (KDS), and menu ordering functionalities to streamline restaurant operations.
- Designed the system to transition restaurant workflows from paper-and-pen processes to a fully digital platform, improving order accuracy and operational efficiency.
- Integrated real-time order management and kitchen coordination features, reducing manual errors and enhancing service productivity.
- Built using .NET MAUI Hybrid Blazor, MariaDB, SQLite, HTML, CSS, JavaScript, and C#, enabling cross-platform deployment, local data storage, and efficient database management.

Computer-Based Document Archiving and Security Management System

- Built a document archiving and security management system to digitize, secure, and centralize organizational records for easier access and monitoring.
- Automated manual record-keeping and paper-based filing processes, reducing document retrieval time and improving data organization.
- Implemented secure storage and user access management features to enhance record protection and support efficient file management for employees.

Cafe Web Ordering System

- Developed a web-based cafe ordering system that enables customers to browse menus, place orders, and manage purchases through an intuitive online platform.
- Integrated Point of Sale (POS), Kitchen Display System (KDS), and Self-Service Kiosk functionalities to streamline order processing and restaurant operations.
- Implemented real-time order tracking and synchronization between customer ordering channels, cashier stations, and kitchen staff to improve service efficiency and order accuracy.
- Designed QR code-based table ordering, allowing customers to access the digital menu and place orders directly from their table using mobile devices.
- Built using ASP.NET Core Razor Pages, Entity Framework Core, SQL Server, HTML, CSS, JavaScript, and Bootstrap.

AWARDS & RECOGNITION

- | | |
|---|-------------|
| • Champion – Best Game Development (Group Project)
College Fair and Symposium, STI College – Cubao | 2025 – 2026 |
| • Certificate of Participation in Website Designing
